## SUFFS OUTWIT SCOTLAND YARD

Managed to Effect the Escape of Mrs. Parkhurst While Police Watched Her.

[By Associated Press] London, England, June 10.—Demonstrating again their ability to outwit the trained detectives of Scotland Yard, the suffragettes last night contrived for Mrs. Emmeline Parkhurst's escape from Grosvenor Square House, where the police were watching her. Miss Bertha Ryland, accused of picture slashing, screeched passages of Scripture at the court when committed for trial.

## YOUR KIDNEYS.

Bryan Residents Must Learn the Importance of Keeping Them Well.

Perfect health means that every organ of the body is performing its functions properly.

Perfect health cannot be enjoyed if the kidneys are weak and disordered. Thousands testify that Doan's Kidney Pills have a reviving action on weak kidneys.

What this remedy has done in so many cases of this kind is the best proof of its merit.

Read the following. It's testimony gratefully given by a resident of this locality:

Paul Fricke, Gayhill, St. Brenham, Texas, says: "I have used Doan's Kidney Pills and don't hesitate to recommend them. I had a lame back and pains through my kidneys. I procured Doan's Kidney Pills and used them as directed. They relieved the backache and pains and also corrected the kidney weakness. I have had no kidney trouble since."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Fricke had. Foster-Milburn Co., Props., Buffalo, N. Y.

## POINTED PARAGRAPHS.

Waste little time arguing with people who don't care.

A woman's idea of saving money is to have things charged.

The average man thinks his intelligence is above the average.

Most men would be ashamed to preach half what they practice.

No wonder Solomon was the champion wise man, with 1,000 wives to coach him.

Many a good fellow has an excellent memory for facts and a poor memory for debts.

Every time we hear of a wedding we wonder how the girl asked the man to marry her.

People who are always telling you things for your own good probably mean well.

The best years of the average man's life are spent in trying to obtain the unattainable.

Show us a man who thinks he knows it all and we can show you a moving picture of a big mistake.

## NEW KISS WALTZ MAY BE ADOPTED

The National Association of Dancing Masters Considering Every Little Movement at Session.

Cleveland, Ohio, June 10.—There is much mystery concerning the future of the proposed "kiss waltz" by Wilford E. Chambers, dance hall promoter, Omaha, Neb., as the result of the consideration it is receiving along with a number of other proposed new dances at an executive session here yesterday during the convention of the National Association of Dancing Masters. Before the two weeks' session is over the country will know what it is to dance next winter.

D. C. McLennan, dance expert from Edinburgh and London, demonstrated a few of the new continental dances following an exhibition of the new "twinkle" waltz by Thomas McDougal, secretary of the association. According to Prof. McLennan, the "twinkle" Chinese dance, probably will win more popularity in this country than any of the other dances. It is danced with varying arrangements of short steps and is particularly graceful, though entirely devoid of gliding movements. Prof. McLennan also will introduce new and modified forms of the tango, maxixe and hesitation waltz that will demand an absolutely upright carriage and be marked by an absence of dips and twistings.

Besides the "twinkle" waltz other new steps are the "contra tempo" waltz and the six-step.

## CROP CONDITION REPORT FOR WEEK ENDING JUNE 6, 1914

Local showers greatly improved the outlook in the central and eastern portions of the cotton belt. Plants made good progress where sufficient rains were received, but large areas are still suffering from lack of moisture and late planting is still making slow progress.

In the western portion of the belt warm and dry weather greatly improved conditions. In Texas and Oklahoma the much needed cultivation is progressing rapidly and conditions have somewhat improved in Louisiana, but general rains are needed in that State and Arkansas.

Over the truck growing regions in the South some relief was given by local showers, but large areas are still suffering from lack of moisture, with permanent injury in many places.

B. BUNNEMEYER,  
Section Director, United States Weather Bureau.

## THIS DAY IN HISTORY

- 1811—Lord Wellington raised the siege of Batajos. The French Governor, Phillipon, made a brave defense.
- 1837—About 300 died daily of the plague at Smyrna, which committed great ravages.
- 1861—Neutrality announced by the French Emperor.
- 1873—Russian expedition under Gen. Kauffmann against Khiva in Turkestan. The capital, Khiva, surrendered this day.
- 1893—Launching of battleship Massachusetts at Philadelphia, Pa.
- 1898—A landing effected by 600 American marines from the transport Panther near the entrance of Guantanamo harbor.
- 1902—Dr. Patton resigned from presidency of Princeton University.
- 1910—Sir Charles Hardinge was appointed Viceroy of India.
- 1912—Transatlantic traffic was tied up at Havre when the sailors joined a strike of transport workers.
- 1913—The United States Supreme Court held that States have a right to fix interstate railroad rates as long as they do not make them confiscatory.

## FARMERS URGED TO PLOW CORN AGAIN

Farm Demonstration Agent Urges That Cotton Be Left Long Enough to Thoroughly Plow Corn.

One of the most serious propositions this demonstration agent has had to contend with recently is to get many farmers to leave their cotton fields long enough to give their corn a fresh plowing after the heavy rains. Many of them had what they called "laid by" their corn before the last big rains came. Some of them put such high ridges to it that it was almost impossible to replow it to do any good. Others who laid it by flat say that it is either to lose the cotton or make less corn, and they had rather make less corn from the fact they need the money that the cotton will bring. Now since this is the position being taken by many of our farmers, and for one I think it a very serious matter and one that should directly concern every man that is making his living out of the farm, I take it that every man wants to, at least, be honest with himself and family. This being the case, he of course wants to do the very best thing possible to make his work count for the most during the cultivation of his growing and maturing crops. So I ask every honest farmer to let us reason together just a little while on this corn and cotton proposition. I do not believe that there is a farmer in Brazos County with any sort of experience but that will say to plow corn just before or about the time it begins to bunch and tassle and let it come a hard rain on it just as you get it plowed, that if it turns off dry, which is more often the case than otherwise, that that corn will make 100 per cent less than the same corn would have made with a good sensible plowing done after the rain. Or to make it plainer: If a field of corn not plowed after the rain would make ten bushels to the acre, with a good reasonable plowing it would make twenty bushels, and the most of our experiences will teach us that the difference will be even greater than this, especially on better land. So taking these estimates as being correct, but they are not correct, for they are far too favorable to the non-plowed corn. Then we will give our corn three sweep furrows to the acre (but if it had been plowed rightly the last time two harrow furrows would have been sufficient), but allowing everything, we will take the three sweep furrows, and one man can plow easily two and a half acres per day, or he can plow his ten acres in four days, and the increase of production on account of the plowing will be ten bushels per acre or one hundred bushels for his four days' work. Now there is not a farmer in Brazos County but what knows that this is the truth, and yet we find plenty of them that will argue that they cannot afford to leave their cotton long enough to plow their corn, when it amounts to twenty-five bushels per day for them. Besides, four days in the growth of cotton does not amount to anything when it might literally ruin a corn crop. You can abuse cotton and work at it until midsummer and then make a reasonably good crop. It is poor farming, to say the least, for any man to neglect his corn for his cotton, and this will never be a prosperous country until the price of corn and other feedstuff is greatly reduced by each farmer raising enough corn to at least run his individual farm.

A. W. BUCHANAN,  
Demonstration Agent, Brazos County.

## ROOSEVELT WEDDING.

Madrid, Spain, June 10.—Kermit Roosevelt and Miss Belle Wyatt Willard were married in this city today by civil service; the religious ceremony will be performed tomorrow, Corpus Christi day. Miss Willard is the daughter of Joseph E. Willard, Ambassador to Spain, who made her debut two years ago, and has been prominent in the social life of Richmond, Washington, Baltimore and New York. Miss Willard visited the Roosevelt home at Oyster Bay, and it was while there that she became acquainted with Kermit. The romance between the beautiful Virginia girl and the son of the former President was little talked about or suspected. Several Richmond girls are visiting the Willards, who will act as bridesmaids in tomorrow's ceremony. It is understood that the young couple, following the wedding, will take up their residence in Sao Paulo, Brazil, where the bridegroom is established in business. His father, former President Roosevelt, arrived here a few days ago, and will remain until the latter part of the month. King Alfonso will grant an audience to the colonel.
